THE FIBRE BROADBAND BOOST

Thankyou for choosing Ultrafast Fibre to supply fibre broadband to your property

WORKING WITH ULTRAFAST FIBRE YOU WILL RECEIVE

ULTRA-FAST RESPONSE

Project quotations promptly after your initial enquiry and a 224(c) Acceptance Letter will be immediately supplied once the project is completed.

FAIR-PRICE ASSURANCE

We have a commitment to fair and competitive pricing. Our standard rates across our regions allow for accurate budgeting of your projects.

LOGISTICS MANAGEMENT

Our Build Team will ensure full fibre-readiness for your subdivision. We will project manage from start to finish, making it easier for you to concentrate on stuff that matters – your business.

DEDICATED BUILD TEAM

You will have a dedicated team of build specialists, project managers, and associates looking after your subdivision or development.

FRIENDLY, PERSONALISED SERVICE

We offer friendly, personalised service on projects both big and small. We're always happy to assist!

What will Ultrafast do?

Join the tube to our fibre broadband network.

Blow in a new fibre cable.

Install the External Termination Point.

Install the Optical Network Terminal.

Test and commission the jack point to host the modem.

Update our records to show the address as being connected, speeding up the connection for the end user.

What you need to do

- 1 From the allocated boundary marker/fibre terminal location or agreed location. Extend the 7x3.5mm micro-duct Lateral through to the dwelling wall. Be careful to stay inside your lot and not trespass the neighbour (please consider future fence posts).

- 2 Run the internal fibre cable or LSZH duct to the same location as the red micro-duct and push through the dwelling wall (minimum 500mm off the ground)*.

- 3 Install an Internal Communications Box (normally in the garage), present the other end of the LSZH duct inside*.

- 4 When your jackpoints are installed and tested, and there is usable power on site, get in touch with us by phone or email so we can complete our part (please book this two weeks ahead of the ready date).

**Where using the smaller rigid flat cable please ensure an extra 2 metres is left at both ends to enable our technicians to terminate the fibre correctly. Please use this product as per the UFF Trade and Developer Installation Guide.*
